

Hey All

Hope you all had a nice weekend and like me are all fully back in the working spirit for this week!!

This blog entry is concentrating on the importance of using things offered to you to help in promoting Reefer POker to your players, which when done will dramatically increase the sign ups and also increase your revenue...

Right now the Reefer POker Bad beat Jackpot is sitting at just under \$750.000 and when a player visits your portal and sees a flashing Bad beat jackpot on there along with a little review it will encourage the player to sign up and possibly take a stab at the jackpot, which in return makes you revenue...

Keeping players up to date with promotions is a key tool in becoming successful in Affiliate Marketing...

What is also a good integration tool is to also have some small tournaments which can be as low as \$2 and invite your players to play and also mention the HUGE Jackpot... This will again give players numerous reasons now to sign up and play!!!

Send me an email if you want tournaments set up and I'll gladly review them and get them off to our tournament team for set up upon approval, and who knows maybe even add some money to the prize pools!

Also make sure to write constant content to add to your site which will help you down the road

with rankngs on google!!!

So my suggestion to you!

Write daily content about the online gambling world in your own words.

Write about the WSOP, the previous days bracelet winners, the upcoming events and the Reefer Poker Bad beat Jackpot along with a little advertising of the tournament you have requested and this all together will guarantee your success in promoting Reefer Poker to your players!

Till my next Blog!
